

# Technology, Intelligence & Automation

Designing Intelligent Systems through  
Strategy and Technology

# What we do

We Design Connected Technology Environments That Work Together, Reliably

Strategy-first discovery, then  
solution design

Hardware, software,  
automation & integration

Built for real-world operation &  
long-term usability

Connected Systems, Reliable Operations & Long-Term Usability

# The problem we solve

Most Buildings And Enterprises Don't Have A Single Source Of Truth

Disconnected  
systems and manual  
monitoring

Low visibility across  
facilities or sites

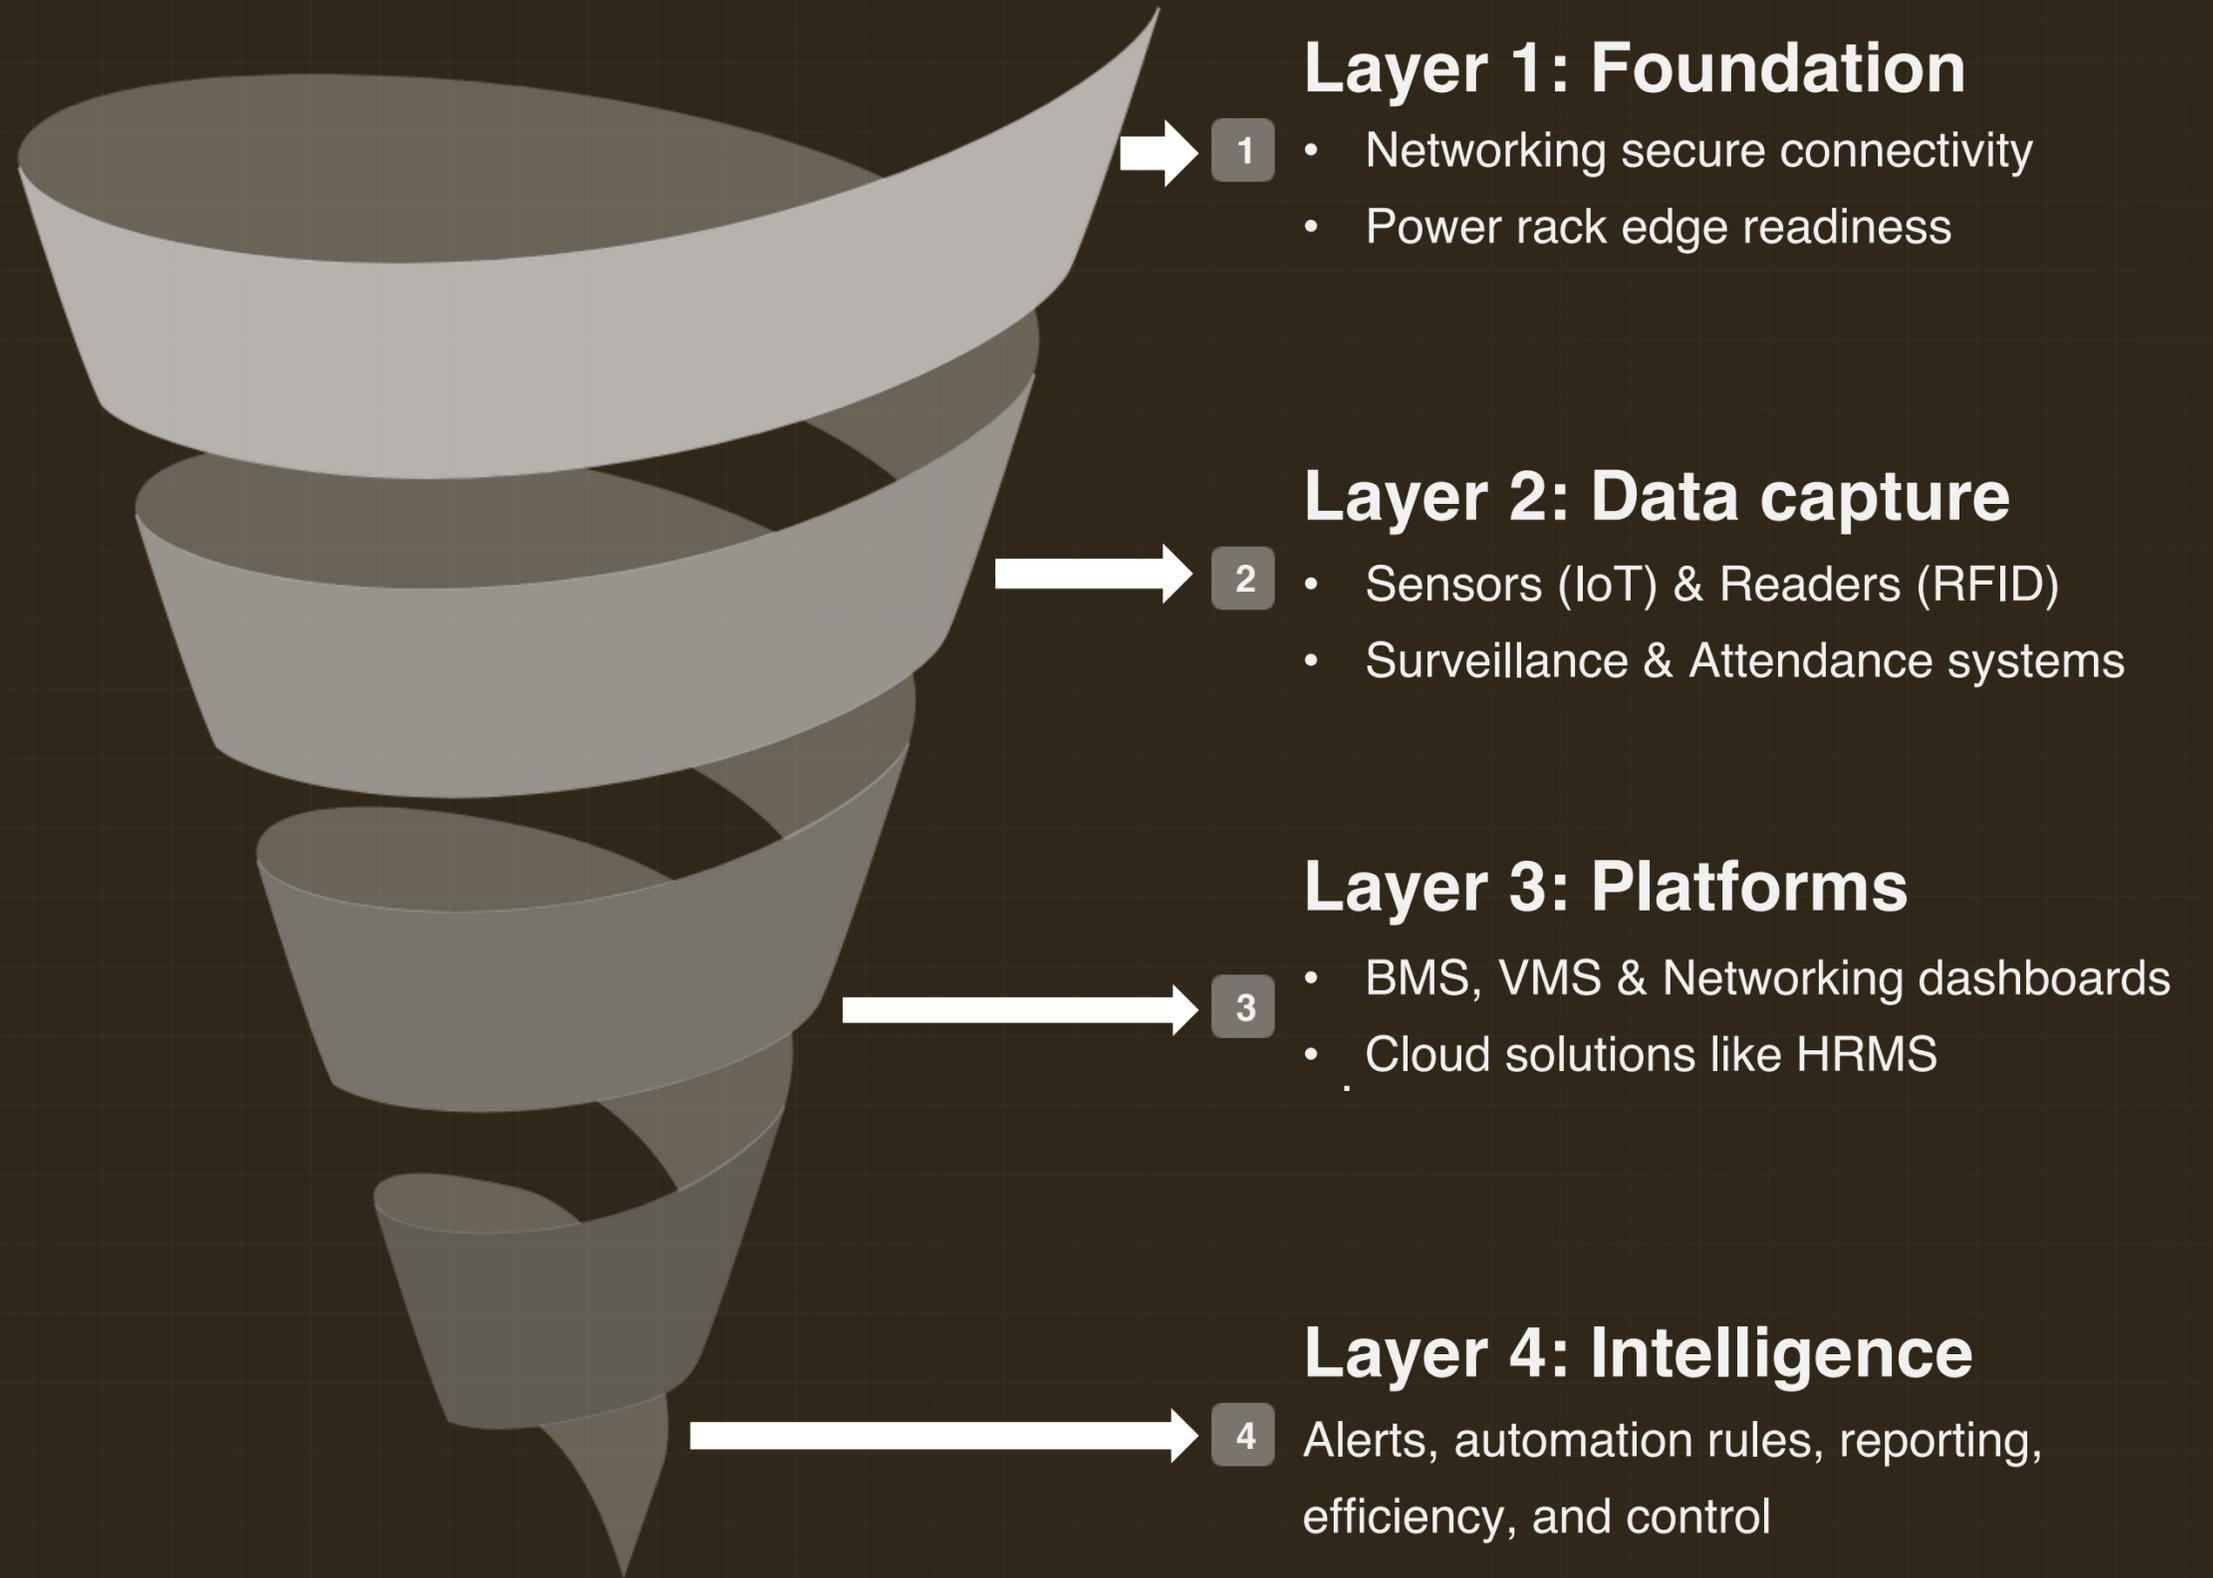

Reactive  
maintenance leading  
to higher energy and  
downtime

Security gaps due to  
siloed tools

# How the stack fits together

# What we Offer

## Smart Infrastructure

- Building Management System
- Enterprise Networking
- IoT & Beyond
- RFID Solutions

## Security & Workplace Systems

- Access Control System
- Visitor Management
- Workforce Attendance
- Surveillance
- Elevator Management

## Enterprise IT

- Cloud Solutions
- Cybersecurity Solution

## Digital & Website

- SEO Services
- UI/UX and Website Development
- Social Media Marketing
- Paid Marketing
- Branding & Logo
- Content Marketing

# BMS and Building Automation

## Centralised control for facilities

- Centralised monitoring of building systems
- Real time visibility across facilities
- Automated responses based on logic
- Reduced manual intervention
- Data driven decision making

## Typical integrations

- HVAC lighting and energy systems
- Access visitor and surveillance
- IoT sensors
- Network monitoring

# Networking and Infrastructure

- Secure connectivity for buildings, users, devices, and applications
- Open, scalable networking options to reduce vendor lock-in
- Designed around business needs, not licensing constraints
- High-performance hardware integration
- Delivered via managed implementation approach

1

## Smart Farms & Greenhouse Monitoring

Control and automate irrigation, humidity, temperature, ventilation, lighting and nutrient dosing using real-time sensor data.

2

## Industries & Factories

Monitor and control machine health, vibration, energy consumption, line conditions, safety alerts and critical equipment status for faster response and fewer breakdowns.

3

## Smart Infrastructure

Control and optimise HVAC, lighting, energy meters, water pumps and tanks, DG and UPS status, and automated alerts from a central dashboard.

4

## Cold Storage & Climate Controlled Storage

Control and track temperature & humidity, door-open events, compressor performance, defrost cycles, power interruptions, and instant alarms to prevent spoilage.

# RFID Solutions

Track assets, inventory, uniforms, vehicles with real-time visibility

## Asset & Inventory

Shipment verification, inventory location, and pallet build verification.

## Laundry Management

Uniform and linen tracking for hotels, factories & healthcare.

## Healthcare Management

Supply & Equipment Management

## Vehicle Management

Vehicle tracking and parking management systems.

# Security and Workplace Systems

Control movement, improve accountability, and maintain audit-ready logs.

## Surveillance & Video Management System

Surveillance planning, IP camera deployments, and central monitoring video management system.

## Attendance Management

Biometric options like fingerprint, face; mobile-friendly and smart card attendance where needed.

## Visitor Management

Digital entry logs, approvals, and reporting for visitor access.

## Access Control System

Boom barriers, turnstiles, and elevator integration based on readiness.

# Cloud Based Solutions

## Zeus Factory Automation

Brings live shopfloor visibility with Kanban, WIP tracking, and bottleneck insights.

## Helios Asset Tracking

Tracks asset allocation, movement, returns, and lifecycle milestones with clear audit trails.

## Athena HRMS

Manages attendance, leave, expenses, and workforce workflows, with device and ERP compatibility.

## Kollegio Academic Management

Streamlines attendance, assessments, academic workflows, quizzes, and reporting for institutions.

## Parcare Parking Management

Automates entry, allotments, permissions, and visitor parking using RFID, LPR, or barcodes.

## Plutus Time-Attendance Management

Tracks employee hours via biometric devices or mobile app. Supports payroll & performance improvement workflows.

# Cybersecurity

Implementing mobile-based 2FA as a cost-effective alternative to hardware tokens.

- Second factor authentication (**2FA**) using mobile devices
- Works for logins and transactions, supports VPNs to SSH use cases
- Deployment options: on-premises or cloud-based 2FA as a service
- Reduced total cost of ownership vs hardware tokens

# Digital and Web

Delivered through Statice Media

## SEO Services

Improve rankings and organic leads with technical SEO, on-page optimisation, and high-intent content.

## Website UI/UX Development

Build fast, conversion focused websites that clearly explain your offering and drive enquiries.

## Social Media Marketing

Grow visibility and engagement with consistent content, strategy, and community management.

## Paid Marketing

Run performance campaigns across Google and Meta to generate qualified leads at a predictable CPL.

## Branding & Logo Design

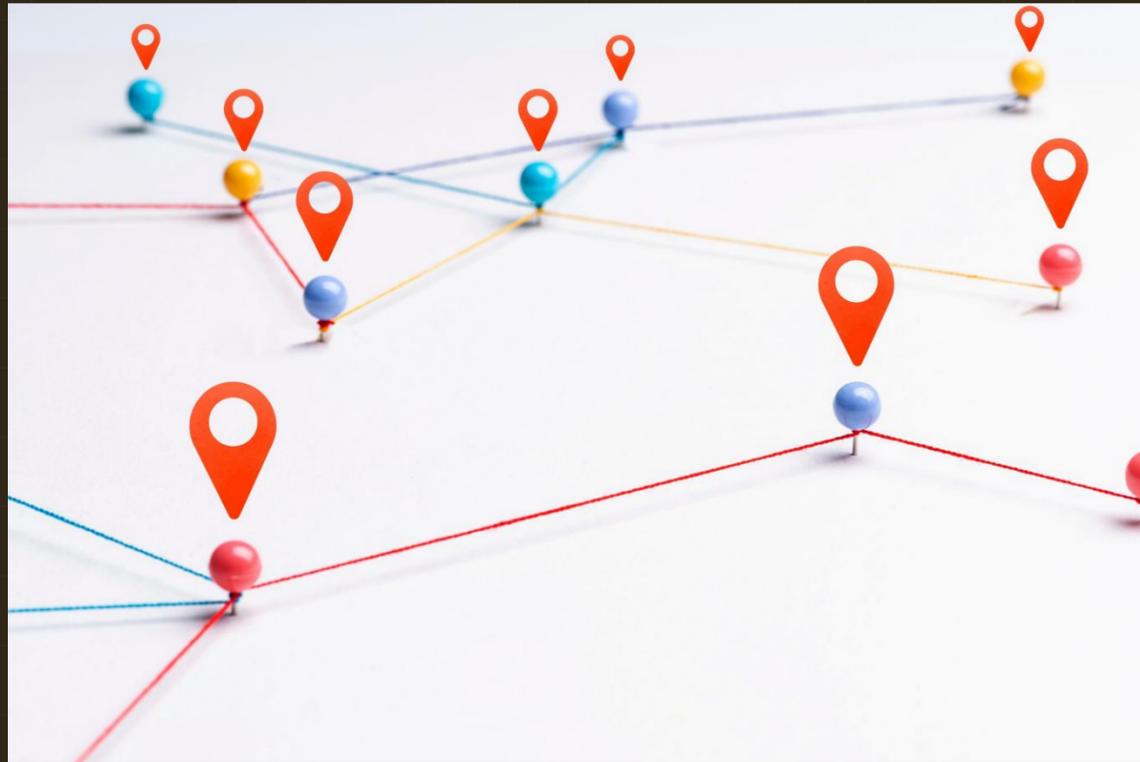

Create a clear brand identity with logos, typography, colours, and guidelines that look premium everywhere.

## Content Marketing

Publish blogs, case studies, and landing page content that builds trust and converts decision-makers.

# How We Deliver and Scale Rollouts

## 1 Audit & assess pilot site

Understand current infra, gaps, and operational challenges

## 2 Standardize the design

Create one consistent blueprint for all locations

## 3 Build a central template

Pre-configured setup for faster deployments

## 4 Phase-wise rollout

Implement property by property with minimal disruption

## 5 Single support & monitoring team

One partner for maintenance, alerts, and troubleshooting

## 6 Scale seamlessly for future properties

Replicate the same setup for every new launch or expansion

# Industries We Serve

Typical solution bundles we implement

## Corporate Offices & IT Parks

- Networking + BMS
- Access Control
- Attendance

## Industrial Facilities

- IoT Monitoring
- RFID Tracking
- Networking + Access

## Healthcare & Hospitals

- Access control
- Asset Tracking
- Surveillance

## Hospitality & Multi Property

- BMS
- Visitor Management
- Surveillance

## Residential Societies

- Surveillance + Visitor
- BMS
- Boom Barriers

## Education Institutions

- Surveillance
- Network Upgrade
- Attendance

# Project Snapshots

## Sobha Forest View & Sobha Forest End

- 300+ 5MP IP cameras and CAT6 cabling
- Centralised monitoring to improve response and safety

## IVAX Paper Chemicals

- Mobile-friendly attendance for on-the-go staff
- Visitor management across manufacturing units
- Turnstiles integrated with facial recognition

## St. Joseph's College of Commerce

- 350+ HD surveillance cameras deployed across campus
- Facial Recognition for staff attendance
- Network overhaul and server room upgrade

## RN Shetty Group of Institutions

- Facial recognition time-attendance for teaching and non-teaching staff
- Campus network upgrade with Aruba APs and Netgear switches

# Businesses That Trust Us

**Tell us what you want to build, we'll map the right solution.**
